Software Evaluation Criteria

You can evaluate five aspects of a program with these criteria categories:

- information in the program,
- career development process,
- user interaction,
- technical aspects of the software and materials, and
- support services.

There are few software programs, even comprehensive career information systems, to which you would apply all 67 of the criteria listed. You will need to omit the criteria that are not appropriate to the type of program you are evaluating.

Some of the criteria are standards of quality that any career development software program should meet. These include such standards as nondiscriminatory language, current and valid information, user control of decision making, program reliability, and availability of technical assistance. Use these important standards of quality to rate every program.

Other criteria (e.g., inclusion of test results or appropriateness for small group use) are features which may not be important for a particular type of program. Do not rate items that are not applicable to the kind of product you are evaluating; cross out their rating scales instead.

If you are rating one program and doing it yourself, you can select criteria and do the rating at the same time. However, if you are comparing several programs, or if several people are doing independent ratings, you first need to make several copies of the rating form. In that case, cross out the criteria that are not applicable, then make copies of the rating form.

For each applicable criterion, rate the program:

5 = Outstanding  4 = Good  3 = Satisfactory  2 = Poor  1 = Unsatisfactory

After you have finished rating the program, you can construct a summary score for it. If you want a summary score, sum the points assigned and divide the total points by the number of items rated, omitting the items you decided were not applicable. Use the overall numeric score only as a guide. If an essential criterion is rated unsatisfactory, you may decide to reject the program even if some of its features are attractive.

Information in the Program

These information criteria cover the following aspects of the program: relevance to the audience, appropriate language, organization of the information, and information quality.

1. The information is clear, concise, and informative to the intended audience
   Outstanding  Unsatisfactory
   5  4  3  2  1

2. The language is nondiscriminatory. Content is free from race, ethnic, gender, age, and other stereotypes
   Outstanding  Unsatisfactory
   5  4  3  2  1

3. The content is free from spelling and grammatical errors
   Outstanding  Unsatisfactory
   5  4  3  2  1

4. All subjects are covered in a comprehensive manner. For example, information about all types of occupations is presented, it covers
   Outstanding  Unsatisfactory
   5  4  3  2  1
90% of total employment in the area where the program is being used. Or, if the information applies specifically to one field of training, it covers all relevant instructional programs.

5. The information for each topic encourages comparisons among schools or occupations

6. Occupational information covers standard occupational categories, duties, abilities, skills, working conditions, equipment, earnings, employment, outlook, training, and methods of entry. It identifies related occupations.

7. Information about educational programs covers program objectives, specialties, degrees conferred, sample courses, and schools offering the program.

8. Information about schools includes general information, admissions, programs of study, housing, costs, financial aid, and student service.

9. The program lists only schools that meet basic licensing requirements. It reports accreditation by recognized organizations.

10. The information is based on empirical data that are current and valid.

11. Updated information is distributed promptly, at least yearly.

12. In a personal search questionnaire, there is a clear, empirical relationship between characteristics of the user and those of the occupations, schools, or other activities being sorted.

13. In a program using off-line or computer-administered assessment instruments, those instruments conform to accepted standards of validity and reliability.

14. Advice is clearly distinguished from factual information. The sources of advice are identified.

15. Statements made in one component are consistent with those made in other components of the program.

16. If the program produces only lists of titles, it effectively refers users to specific sources of accurate information.

17. Published information sources are readily available, for example, in local career information centers.

18. To supplement objective information, the program suggests interviewing individuals about their personal career histories, including how they feel about their schools or jobs.

Career Development Process

These criteria evaluate the compatibility of the program with important career development principles.

24. The program supports informed decision making by helping individuals generate ideas, obtain necessary information, and evaluate alternatives in responsible and personally relevant ways

25. The program encourages the user to get appropriate counseling and advice in making long term decisions

26. Using the program integrates planning with previous experiences

27. The user, not the program, controls the decision making

28. The structure of the program demonstrates that career planning is a developmental, lifelong process

29. The program is appropriate for individual use

30. The program is appropriate for small group use

31. The program can be a useful resource in a counseling program

32. The program provides information that can be useful in instruction

33. The program can be a useful resource in a job search program

34. Using the program contributes to a person's career development

**User Interaction**

These criteria cover the user's interaction with the program, the objectives and features of the program, and your analysis of it.

35. The purpose of the program is well defined and clearly explained to the user

36. The organization is clear, logical, and effective, making it easy for the intended audience to understand

37. The language in the program and in the user's guide is clear to the intended audience

38. User materials are easy to use, appealing to users, and readily available

39. Prerequisites are identified and instruction is provided in the software or in the user guides so individuals can run the program and understand its results

40. The individual has the choice of going directly to desired information or using a structured search to identify relevant topics

41. The individual can operate the program independently, creating his or her own sequence of presentation and review

42. The program acknowledges input. Feedback on user responses is employed effectively

43. Invalid commands are handled constructively. The program tolerates variations in command formats (e.g., upper or lower case, extra spaces, etc.)

44. Individuals can easily start and exit the program. It is easy to back up, change answers, and give commands

45. If there are "help" and "hint" messages, they are easy to access

46. If the program contains tests of knowledge or skill, it reports which items were missed and which were correct

47. The program is attractive and interesting. It motivates users to continue using the program and exploring career options

48. The program is demonstrably effective with the intended audience, including people of varying abilities and experiences 

49. The program can be used by various cultural groups 

50. The program achieves its purpose 

51. The system uses standard equipment that is reliable, widely available, and applicable to a variety of uses

52. Computer capabilities such as graphics, color, or sound are used for appropriate instructional reasons

53. If the program requires special equipment, the requirements are minimal and clearly stated by the developer

54. The program is reliable in normal use. Software is bug free

55. The program provides a copy or summary of its basic information to the user for future reference

56. Printouts are clear and well organized. The printouts are dated

57. Updates can be loaded easily into the system

58. If any processing in the program is based on assessment scores, course grades, or other client records, the program explains to the user how the records are being used

59. If the program uses client records, it does not restrict an individual in exploring any of the information in the program

60. If the program creates a permanent record for a user, that record is secure and confidential. There is provision for erasing the record when the information is no longer valuable in providing services
Support

These criteria cover aspects of support for professionals who implement the program: written materials, staff training, service, and cost.
